r26.2.2 Changelog

```
+--------------------------------+
|   r26.2.2  Release - 174130
+--------------------------------+
```

Release day November 29th 2023

Fixes

- DSOF-24356 - Fixed an issue where inserting time that would push layers beyond the end of a track did not extend the track

- DSOF-25007 - Fixed 'Invalid t: > track length' error when dragging to the end of timeline that had a video that was a frame long at the end

- DSOF-25595 - Fixed an issue that occurred when global crossfade pairing with audio layers caused stuttering and hangs when jumping around timeline

- DSOF-25637 - Fixed an issue where "Director is under heavy load" notification did not always clear

- DSOF-25663 - Fixed an issue where the compose layer would sometimes display black when being shifted horizontally

- DSOF-25691 - Fixed an issue where matrix commands sent to a Blackmagic Smarthub 12g sometimes didn't set the configuration correctly
