

r30.7.1 Changelog

+-----+
| Release Full (Pro) - 214307 |
| Release Starter - 214304 |
+-----+

Release day: April 9th 2025

Improvements

- DSOF-29890 - Added a new Plugins method: `Editor.exportResource` for exporting .d3export files. You can find our extensive developer documentation for the Plugins API [here](https://developer.disguise.one/plugins/docs/).
- DSOF-29767 & DSOF-29874 - Various error messages about opening Starter and Full versions of the software are now clearer.

Fixes

- DSOF-29934 - Playing into the first VideoClip keyframe on a video layer will no longer start the video from 0.
- DSOF-29930 - Starter can now open projects normally on machines running Windows Home.
- DSOF-29825 - Modifying the joints of skeletons on Editor machines now correctly updates on the Director machine.
- DSOF-29879 - Quantised timelines now respect their transport's "On Clock Lost" setting.
- DSOF-29990 - Installing multiple versions of Designer in the same network will no longer produce notification spam in rare circumstances.
- DSOF-29537 - Resizing plugin windows no longer causes the content in the window to flash.
- DSOF-29861 - Full versions of Designer can now make checkpoints again.
